

Expand SpotLight

Illuminate your message for your target audience.

Use the adapter (supplied with the L4-BLA-50US) for the Expand BannerStand and Expand BrochureHolder.

Use the double-sided adapter (supplied with the L5-BLA-50US) for the Expand MediaScreen 2 and Expand SmartStand (double-sided).

Expand SpotLight

Expand's 50 W spotlight has been improved with a new design and higher quality. The old, chrome cover has been replaced with a rigid plastic cover. The new material prevents the spotlight from overheating, which makes it easier to handle and adjust when the light is on. The light bulb is securely held in to place with a new fitting. There is a practical cord holder which helps prevent the cord from becoming tangled. The version available in the United States will also incorporate a dimmer switch so you can adjust the brightness of the spotlight.

The new spotlight fits all of Expand's retractable and non-retractable products (excl. Expand XStand and pop-up displays). It is delivered in a protective black nylon bag for easy and secure transportation. The straps on this bag allow for this bag to be easily attached along side of our other bags.

Expand's new spotlight is ETL certified under categories UL, CSA and CE. The spotlight has also been approved according to the Intertek-Semko S-mark, which means that the lamp has passed tests conducted by an independent third part. Expand is one of few manufacturers on the market today that fulfills the demands for an S-mark. The S-mark guarantees the highest safety when you use our products
