

IQ-IJ260

Silk Crepe

Coated silk.

The material can be draped in a natural way, something that is only possible with textiles.

The material is very soft to the touch. The print and photo reproduction is transparent on the reverse (up to 90%). Ideally suitable for fashion design and clothing, but also for flags, banners and presentation textiles.

The material is fixed on a removable backing for a stable transportation through the printer.

Usability

- Compatible with dye- and pigment inks
- For brilliant colors, ink settings must be optimized according to ink, printer and software instructions.
- Suitable for most large format thermal or piezo printers.

Indoor use for

- Fashion Design (scarves, ties...)
- Banners
- Flags
- Exhibit booths
- Indoor signs
- Shop decorations
- Shows
- Window displays
- Curtains

Characteristics

Material	100% Silk Crepe de Chine
Weight/Thickness	60 g/m ² ; 0,16 mm
With paper release liner	135 g/m ² ; 0,23 mm
