48 in. (122 cm) tangential vinyl and contour cutter

## S140 T

54 in. (137 cm) tangential vinyl and contour cutter

## S160 T

64 in. (163 cm) tangential vinyl and contour cutter

## Genuine tangential cutters that provide unsurpassed cut-quality.

When it comes to cut-quality, nothing compares to genuine tangential cutting. With advanced computer-controlled blade rotation and up to 600 grams of cutting force, Summa S Class T Series cutters simply cut better and deeper than any other cutter in their class. Graphics weed easier. Thick materials cut like butter. Intricate designs are cut flawlessly. Thanks to its genuine tangential cutting head, Summa S Class T Series cuts with the precision of a flatbed while giving you the ease and high-speed of a roll-fed cutter.

By combining the world's most advanced cutting technology with legendary Summa tracking, the Summa S Class T Series family of cutters are truly in a league of their own. Yet as advanced as Summa S Class T Series cutters are, they are also remarkably easy-to-use. All Summa S Class cutters are adorned with a touch-sensitive LCD control panel that makes navigating context-sensitive menus a breeze.

Like the Summa S Class D Series, T Series cutters offer the same precision, durability, and features that are the hallmark of every Summa S Class cutter. When paired with a computer-controlled blade rotation, Summa S Class T Series sets the standard by which all other cutters are measured.

With its genuine tangential cutting head, Summa S Class T series gives the world's most advanced cutter unmatched cutting quality.

An exclusive touch control panel makes the Summa S Class a breeze to navigate through its advanced functions and settings.

OPOS X contour-cutting alignment delivers OPOS' unparalleled accuracy and automation, even through thick laminated images.
