

MegaCoat XL

63" UV Coater: Also Available In 50"

TEC Lighting, Inc.
WORLD LEADER IN CURING AND COATING EQUIPMENT

The MegaCoat XL is the large format UV coater for today's wide format printer. The MegaCoat has the ability to apply a wide range of UV coatings specifically designed to address the challenges that wide format printers face when it comes to enhancement and protection. UV coating can increase color vibrancy, reduce the appearance of "Banding" and help protect against the elements including chemical and UV light.

With the MegaCoat XL you can coat materials ranging from pressure sensitive film to 1" board and everything in-between.

Screen • UV Inkjet • Solvent Inkjet • Latex Inkjet • Rigid Board • Flexible media

FEATURES

- 63" and 50" application width available
- Process speed of 80 linear FPM
- Advanced UV curing system with parabolic reflector
- Scraper blade system prevents coating transfer to bottom roller
- Multi-line peristaltic pump system with 2 coating reservoir
- UV coating cost less than .06-.08 cents per SqFt

OPTIONS

- Air Knife system for Pressure sensitive film
- High capacity feeder and stacker 63" x 78"
- Roll-To-Roll 63" / 50"

LAMINATION IS OUT, **UV IS IN!**

The facts are clear. Wide Format UV Coaters are the future of wide format finishing.
