

IMAGEPRINT

Runs Every Device

Newest solution from ColorByte tailored to a broader audience looking to achieve optimal color accurate prints.

ColorByte's new ImagePrint R.E.D. software comes together to deliver unrivaled speed with exceptional quality.

ImagePrint R.E.D. is ColorByte's newest entry in the printing world. ImagePrint R.E.D. is designed for those looking to make superior prints at an attractive price point. With advanced color management controls, the same intuitive user interface, and by using the driver that ships with the printer, ImagePrint R.E.D. is an attractive option that can "Run Every Device" – available at just \$399 for Desktop printers 17" and below and \$599 for printers above 17" inches.

Who needs it?

- Photographers
- Graphic Artists
- Fine Art Professionals
- Engineers and Architects
- Promotional Printers

Typical applications utilized in:

- Photo Layouts
- Gallery Wraps
- CAD and Engineering Drawings
- PDF Workflow

Feature Overview:

- RIP software built from the same feature set of the full ImagePrint software
- Automatic color management - by default, correct profile will be automatically selected when selecting paper made by the printer manufacturer. Just select the Media Type, and ImagePrint R.E.D. will do the rest to maximize the color management.
- Workflow automation tools - automatic nesting, sizing, smart cropping, layout guides, multi page layout, tiling, borders, gallery wraps, color managed PDF support, archive & restore utility
- Professional level spool & queue management system
- Accurate preview shows exactly what print will look like on any paper
- Supports CMYK and RGB workflows for proofing and simulation.

Compatible with any device containing a manufactures print driver. For more information please visit:
