KODAK
Premium Rapid-Dry Photographic Glossy Paper / 255g

Properties	Specifications
Material	Resin-coated photo paper
Gauge	10 mil, 255g
CIE Whiteness	>130
Environmental	FSC®-certified paper
Opacity	>90
Printer/Ink Compatibility	Compatible with all thermal and piezo inkjet printers using water-based dye and pigment-based inks.
Software Setting	The photo lustre paper setting in most RIPs is appropriate; however, we recommend a custom ICC profile for optimal results. Please refer to www.brandmangagementgroup.com for ICC profiles for some printers.
Light Fastness	The photo lustre paper setting in most RIPs is appropriate; however, we recommend a custom ICC profile for optimal results. Please refer to www.brandmangagementgroup.com for ICC profiles for some printers.
Finishing/Post Processing	It is always recommended that a protective laminate be applied after printing. Hand applying laminate is not recommended. Pressure-sensitive or thermal laminates can be used. Before applying the laminate, allow the image to dry for 24 hours.
Handling Recommendations	Avoid touching the coated surface and use cotton gloves when handling inkjet coated materials. Rolls of Kodak inkjet media come with the coated side facing out.
Ideal Storage Conditions	70° F (21° C), 50% R.H. (a controlled environment is recommended); store in original packaging.)
Shelf Life	1 year from the BMG ship date when stored in proper conditions.
