# KODAK PROFESSIONAL

## Inkjet Artist Canvas, Matte / 410g

Properties	Specifications
<b>Material</b>	65% polyester, 35% cotton base
<b>Fabric Weave</b>	2 x 1 weave
<b>Gauge</b>	18 mil
<b>Base Weight</b>	410g
<b>Whiteness</b>	>100 CEI
<b>Printer/Ink Compatibility</b>	Compatible with all thermal and piezo inkjet printers using water-based dye and pigment-based inks.
<b>Software Setting</b>	The coating is engineered for more than 300% ink coverage. A Heavy Weight Coated or Enhanced Matte setting is recommended as a starting point. However, a custom ICC profile is ideal for optimal results.
<b>Light Fastness</b>	Inkjet ink fading time is based on the inks you use and the print display environment. Dye-based inks fade noticeably under direct sunlight and interior applications where direct sunlight may fall on the image, and/or where fluorescent or other UV lighting is present. Though fading is inherent in all inkjet inks, certain UV-resistant inks, pigment-based inks, and UV-inhibiting coatings will extend image longevity. For light-fastness data and to determine an ink's suitability for the application, contact the ink manufacturer.
<b>Optimal Service Environment</b>	66-77° F , 20-60% R.H.
<b>Finishing/Post Processing</b>	No post processing or finishing is required, though a clear fixative may be applied to enhance certain areas of the print.
<b>Handling Recommendations</b>	Avoid touching the coated surface and use cotton gloves when handling inkjet coated materials. Rolls of Kodak inkjet media come with the coated side facing out.
<b>Ideal Storage Conditions</b>	70° F (21° C), 50% R.H. (a controlled environment is recommended); store in original packaging
<b>Shelf Life</b>	1 year from the BMG ship date when stored in proper conditions.
